CORE ATTENDEE EDITION: Start with 00_START_HERE.md at the pack root. Only the core two-day route is supplied. Optional publishing, dummy website, resource creation, identity/networking and advanced Azure tracker extensions mentioned below are not assigned or included. Use your own extracted path where a command shows C:\YOUR-ATTENDEE-PACK. Do not copy instructor settings.

Two-day timetable - 09:45 to 17:30

Each day is 465 minutes including lunch and breaks. Use assigned resources and the day-specific order guides. Optional work does not replace core evidence or cleanup.

Day 1 - understand the components

Start	Finish	Block
09:45	11:05	Welcome, introductions, foundations and orientation
11:05	12:20	SQL including cost decision
12:20	12:35	Break
12:35	13:40	Blob including cost decision
13:40	14:25	Lunch
14:25	15:40	Function
15:40	15:55	Break
15:55	16:50	Logs/KQL
16:50	17:30	Troubleshooting, knowledge check, cost recap and cleanup

Includes a guided 15-minute portal walkthrough and SQL/Blob cost decisions. The HTTP Function, SQL, files and synthetic KQL remain independent exercises.

Day 2 - cost and observability first

Start	Finish	Block	Minutes
09:45	10:00	Welcome, recap and portal orientation	15
10:00	11:15	Mandatory Cost Management investigation	75
11:15	11:30	Break	15
11:30	12:45	Application Insights: requests, failures and dependencies	75
12:45	13:30	Lunch	45
13:30	14:45	KQL: first rows, failures, slow dependency and correlation	75
14:45	15:00	Break	15
15:00	15:35	Service Bus Explorer: standalone send, peek and receive	35
15:35	16:20	Local document tracker: realistic outcomes	45
16:20	17:00	Team incident and cost trade-off exercise	40
17:00	17:30	Knowledge check, evidence, cleanup and close	30

Cost comparison and budget design are mandatory; creating a real budget needs approval. Use live telemetry only when prepared and authorised, otherwise labelled prepared/offline data. The local tracker is not Azure-integrated. CI/CD and IaC remain awareness-only.
