CORE ATTENDEE EDITION: Start with 00_START_HERE.md at the pack root. Only the core two-day route is supplied. Optional publishing, dummy website, resource creation, identity/networking and advanced Azure tracker extensions mentioned below are not assigned or included. Use your own extracted path where a command shows C:\YOUR-ATTENDEE-PACK. Do not copy instructor settings.

Day 2 - cost, observability and realistic operations

LBS | Attendee edition | Fictional data only | Updated 28 October 2026

Before you start

Expected duration: 09:45-17:30

Prerequisites: Day 1 component concepts; whole attendee pack kept together.

Required permissions: Assigned read scopes for costs and telemetry; data roles only for the queue exercise.

Resources created: None required on the core route.

Cost considerations: Reuse existing approved resources. New budgets/alerts, instrumentation and deployments are optional approved extensions.

Safety: Use the assigned tenant, subscription and resource only. Do not change shared networking, roles, tiers or deployment settings. No real documents, secrets or keyed URLs in evidence.

Today's priorities

Cost Management and Application Insights/KQL are mandatory core activities. Service Bus is a shorter standalone exercise.

Use live data only when prepared and authorised. Otherwise use the supplied fictional dataset and label the result prepared or offline. A fallback is not a passed live-cloud test.

Start	Finish	Activity	Minutes
09:45	10:00	Welcome, recap and portal orientation	15
10:00	11:15	Mandatory Cost Management investigation	75
11:15	11:30	Break	15
11:30	12:45	Application Insights: requests, failures and	75

		dependencies	
12:45	13:30	Lunch	45
13:30	14:45	KQL: first rows, failures, slow dependency and correlation	75
14:45	15:00	Break	15
15:00	15:35	Service Bus Explorer: standalone send, peek and receive	35
15:35	16:20	Local document tracker: realistic outcomes	45
16:20	17:00	Team incident and cost trade-off exercise	40
17:00	17:30	Knowledge check, evidence, cleanup and close	30

Open these guides in this order

1. 06_Cost_Management_Portal_Lab.docx (mandatory, 10:00).

2. 02_Application_Insights_Portal_Lab.docx (11:30), then 03_KQL_Beginner_Hands_On.docx (13:30).

3. 01_Service_Bus_Portal_Lab.docx (15:00): only the assigned standalone Explorer steps.

4. LBS_Document_Tracker_Setup_And_Testing.docx (15:35): local-only, fictional data.

5. 04_Incident_And_Cost_Team_Exercise.docx (16:20).

Supporting files: Labs\Day2Operations relative to the attendee-pack root. It contains CSVs and three query modes.

Optional identity and networking handouts are not included in this core pack. CI/CD, ARM/Bicep and automation are awareness-only unless a separate tested runbook is supplied; they are not extra core labs.

Optional portal resource-creation guides are not included in this core pack. Existing resources are the default; do not create duplicates.
